

Missouri

Missouri General Comments

- Ft Leonard Wood's success as home of the Combat Support Training Center of Excellence has enabled the Army to continue that model of consolidation of complementary training in both Combat and Combat Service Support training in its BRAC recommendations. The net impact of these school moves on the local communities should be negligible.
- Moving personnel from leased facilities onto military installation provides an important benefit of force protection.
- Closing RC facilities is offset by the construction of modern AFRCs that will be the right size and design to support units that will be stationed there. Transforming Reserve Component facilities in the State of Missouri will improve training, readiness and quality of life for more than 1245 Reserve Component soldiers, full-time unit support personnel, and their families.

Reserve Component

Gains:

- Build 2 Armed Forces Reserve Centers

Losses:

- Close 2 Army Reserve Centers
- Close 1 Army National Guard Readiness Center with State permission

Fort Leonard Wood

BRAC 2005 Recommendation:

BRAC 05 recommendations have no major impacts on Ft Leonard Wood. They consolidate Army Drill Sergeant Training at Fort Jackson, which is balanced by the relocation of the Prime Power School to Fort Leonard Wood.

Gains

- The Army Prime Power School from Ft Belvoir

Losses:

- The Drill Sergeant School to Ft Jackson

Lake City Army Ammunition Plant

Gains:

- None

Losses:

- None

Human Resources (HR) Command (Leased Site)

Gains:

- None, close HRC lease site

Losses:

- Human Resources Command St. Louis to Ft Knox
